

## **Commitment to Our Customers**

Dialog is committed to meeting your most stringent demands and standing behind our well site performance. By listening intently, we are able to develop unique, value-added solutions for you, our Customer. Our goal is to grow long term relationships by providing quality service before, during, and after the job.

We have recruited the best personnel with the experience and training to perform pipe recovery, logging, completion and pump down perforating services. We have invested in state of the art downhole tools, equipment and accessories, and software answer products in order to improve service capabilities and service quality.

Dialog is committed to the health, safety and environment culture and performance results that are the recognized leader by our customers, employees, competitors and community. We understand that obtaining and maintaining this culture and these results will only come from a total commitment by all employees.
